

JUNCTION BOX THERMOSTAT TYPE STC/

Industrial junction box/thermostat units designed for the termination and temperature control of electric trace heating systems and other industrial applications. They can be used for frost protection and process temperature maintaining of pipe work and storage tanks.

Units may be used as an air sensing or pipe sensing thermostat. The unit is supplied in the air sensing mode with capillary bulb fixed to the enclosure. Removal of the bulb from the housing tube converts the unit to pipe sensing.

Type STCI has a transparent lid which allows the user to see the temperature set point without opening the unit. The unit is also fitted with indicating neons that show 'MAINS ON' and 'HEAT ON'
